Looking for a long-term career position in front end or full stack web development. Experienced in marketing and public speaking. Skilled in React, TypeScript, Hooks, Context, Testing Libraries, MySQL, UX Design, AGILE methodology, and Adobe Creative Cloud.

WORK EXPERIENCE

Axway: Software Engineer II   May 2018 - Present
State Farm: Complex Claims Specialist   May 2016 - May 2018
Fuhu, Inc: National Sales Trainer   July 2013 - January 2016
Nintendo of America: Marketing Representative   September 2006 - July 2013

APPLICATIONS BUILT

AMPLIFY Central (Axway)
- API Management via proxy, including security, observability, analytics, and exposure.
- My major contributions include implementing JWT authentication, designing & creating the public API Catalog, Observability filtering, and the complete Observability details page.
- **TypeScript**, React, **Hooks**, Redux, Sagas, **JWT**, React-Router, SASS, Kent Dodd's **Testing Library**, Enzyme, Mocha, **Kubernetes**, Jenkins, Fortify Security
- https://apicentral.axway.com

Ride The Teacups (Personal)
- A full stack React application written on Node. The Express server runs Helmet security, JWT user authentication, and Sequelize database management. The UI is a blog and gaming platform written in React with Hooks and Context, Redux and Sagas, and Helmet SEO.
- React, **Hooks**, **Context**, Redux, Sagas, **React-Router,** Express, Helmet, **JWT**, **MySQL**, CSS, **SEO**, Google Analytics
- http://www.ridetheteacups.com/

Arthur (Final Class Project)
- Arthur is a MERN full stack data-driven application. Arthur will link to your Google Calendar, find who you are meeting with, and provide a briefing on both the person and the company. Steve was responsible for the React implementation & front-end design, UX, Bootstrap, CSS, graphics, and CI-CD.
- **React**, React-Router, **Express**,Axios, Mongo DB, CSS
- NOTE: Due to API changes from Facebook and LinkedIn, Arthur is no longer functional.
